

Tourism Website Research & Design Report

Comprehensive Front-End UI Analysis, Color Palette & Page-by-Page Feature Breakdown

Project: Tourism Agency Web Application **Architecture:** Front-End Only (Next.js & Tailwind CSS) **Scope:** Static Data & Interactive UI

1. Color Palette & UI Theme

The design uses vibrant ocean and nature-inspired colors to give a modern, welcoming, and high-end travel feel.

Primary Accent Colors

- #0F766E Ocean Teal:** Primary buttons, brand headers, and key CTAs.
- #0284C7 Sky Blue:** Navigation highlights, tag badges, and secondary buttons.
- #F59E0B Warm Gold:** Star ratings, price tags, and special feature badges.

Backgrounds & Neutral Tones

- #F8FAFC Soft Gray/Cream:** Light background to reduce eye strain.
- #FFFFFF Pure White:** Clean card containers and modal popup dialogs.
- #1E293B Slate Black:** Sharp body text and dark footer section.

LankaVista Tourism UI Overview

Figure 1: LankaVista Complete 7-Screen Front-End Design Concept (Pure Front-End Architecture)

2. Pure Front-End Scope Clarification

This entire web application design is built as a **100% Front-End Static Application**. It does not require any backend database or server infrastructure:

- Data Management:** All travel packages, destinations, reviews, and services use static JSON/JavaScript data files (`data/destinations.js` and `data/services.js`).
- Interactive Features:** Features like search, category filtering, budget calculation, and quiz questions are powered entirely using React `useState` on the client side.
- Form Submissions:** Contact form submissions display on-screen confirmation alerts without sending data to an external server.

3. Detailed Page-by-Page Scope Analysis

PAGE 1

1. Home Page (Landing Page)

- **Hero Banner:** Bold headline ("Discover the Wonder of Sri Lanka"), search bar, and quick stats counter.
- **Highlights Section:** Core benefits (Local Experts, Best Experiences, 24/7 Support).
- **Explore by Experience:** Visual category cards (Beach Escapes, Wildlife, Mountain Adventures).
- **Featured Destinations & Packages:** Destination previews with pricing and quick links.
- **Testimonials & Gallery:** Customer reviews with star ratings and photo gallery grid.

PAGE 2

2. About Us Page

- **Our Story & Mission:** Company origin story with mission and vision side-by-side.
- **Core Values:** Highlight blocks for Authenticity, Sustainability, Hospitality, and Adventure.
- **Team Section:** Profile cards displaying team members, photos, and roles.
- **Sustainable Travel:** Educational section promoting eco-friendly and responsible tourism.

PAGE 3

3. Services Page

- **Services Grid:** Cards for Tour Packages, Hotel Booking, Airport Transfers, and Guided Tours.
- **How It Works:** Simple 4-step travel process (Tell Us Your Dream -> Design Journey -> Approve -> Enjoy).
- **Popular Packages:** Curated package previews with days, nights, and prices.

PAGE 4

4. Locations Page

- **Search & Filter:** Live search input with category filter tags (All, Beach, Mountain, Wildlife, Heritage, City).
- **Destination Cards Grid:** Responsive cards featuring photo, location name, province, rating, and best time to visit.

PAGE 5

5. Destination Details Modal (Pop-up)

- **Overview Modal:** Opens on "Explore" click showing photo gallery, location details, and rating.
- **Key Info Badges:** Best Time to Visit (e.g., Jan - Apr), Duration, Travel Style, and Average Budget (\$50 - \$100).
- **Top Things To Do:** Bullet points of highlights and activities.

PAGE 6

6. Interactive Travel Quiz

- **Personality Questionnaire:** Step-by-step quiz to find the user's travel style (e.g., Beach Relaxing, Nature & Mountain, Wildlife, Culture).
- **Smart Match:** Suggests matching destinations based on user answers using client-side logic.

PAGE 7

7. Custom Trip Planner & Budget Calculator

- **Itinerary Builder:** Add destinations (Ella, Kandy, Sigiriya) to build a custom travel plan.
- **Live Budget Estimator:** Dynamic calculator adjusting total estimated cost based on travelers and total days.

PAGE 8

8. Contact Us Page

- **Contact Form:** Fields for Name, Email, Subject, and Message with instant UI confirmation.
- **Details & Map:** Physical address, phone, email, opening hours, and embedded interactive map.

4. Recommended New Features to Implement

- **1. Quick Destination Details Modal:** Implement modal dialogs to view location details without page reloads.
- **2. Client-Side Search & Filter:** Dynamic search input on Locations page using JavaScript array filtering.
- **3. Interactive Travel Personality Quiz:** Multi-step stateful quiz component.
- **4. Dynamic Budget Estimator:** Simple price multiplication formula (``Travelers * Days * Daily Rate``) for real-time cost feedback.
